

WE ARE LEARNING...

OUR SCHOOL VALUES

To be a LEARNER.
To be curious about the world around us and share our thoughts and learning.

You can help me at home by encouraging me to be interested in events or everyday occurrences by noticing them with me and asking questions and investigating how things work.

LITERACY

To predict what will happen in books and question what I liked / disliked about the characters and events.

To read and learn my sight words.

To identify words that rhyme.

To blend and segment words into their sounds.

To write sentences using letter and sound knowledge, spaces between words, capital letters and full stops.

You can help me at home by encouraging me to read aloud every night with my reader and practise my sight words. You can help me log on to my Reading Eggs account to work on my reading and rhyming words. Encourage me to write shopping lists, letters, sight words and stories at home.

NUMERACY

To count to and from 20 and order small collections.

To add and subtract numbers using real world problems.

To answer simple questions to collect information and make simple inferences.

To connect events and the days of the week

You can help me at home by counting forwards and backwards from 20 and beyond. Practise recognising small amounts when grouped together, for example when rolling a dice count the dots. Help me to identify simple addition and subtraction problems to ten using objects. Support me in recording tally charts and by talking to me about my week and the events connected to my days.

INQUIRY FOCUS

On the move!

We are exploring the physical world. We will be investigating why objects move, how we can make them move and observing parts that enable them to move. We will explain how we are thinking and communicate what we already know about movement.

You can help me at home by investigating objects and toys that move and discuss why and how (eg. roll, slide, turn) they move. For example, does the object move because I push or pull it? You could notice moving things in the world around us and explore these forces.

LEARNER ASSETS

To communicate and listen respectfully to others.

To use words to solve problems.

To share and express my thinking.

To talk about or show what we already know about something.

To notice and explain how we are thinking and feeling.
